

Mega Zen

MERCK

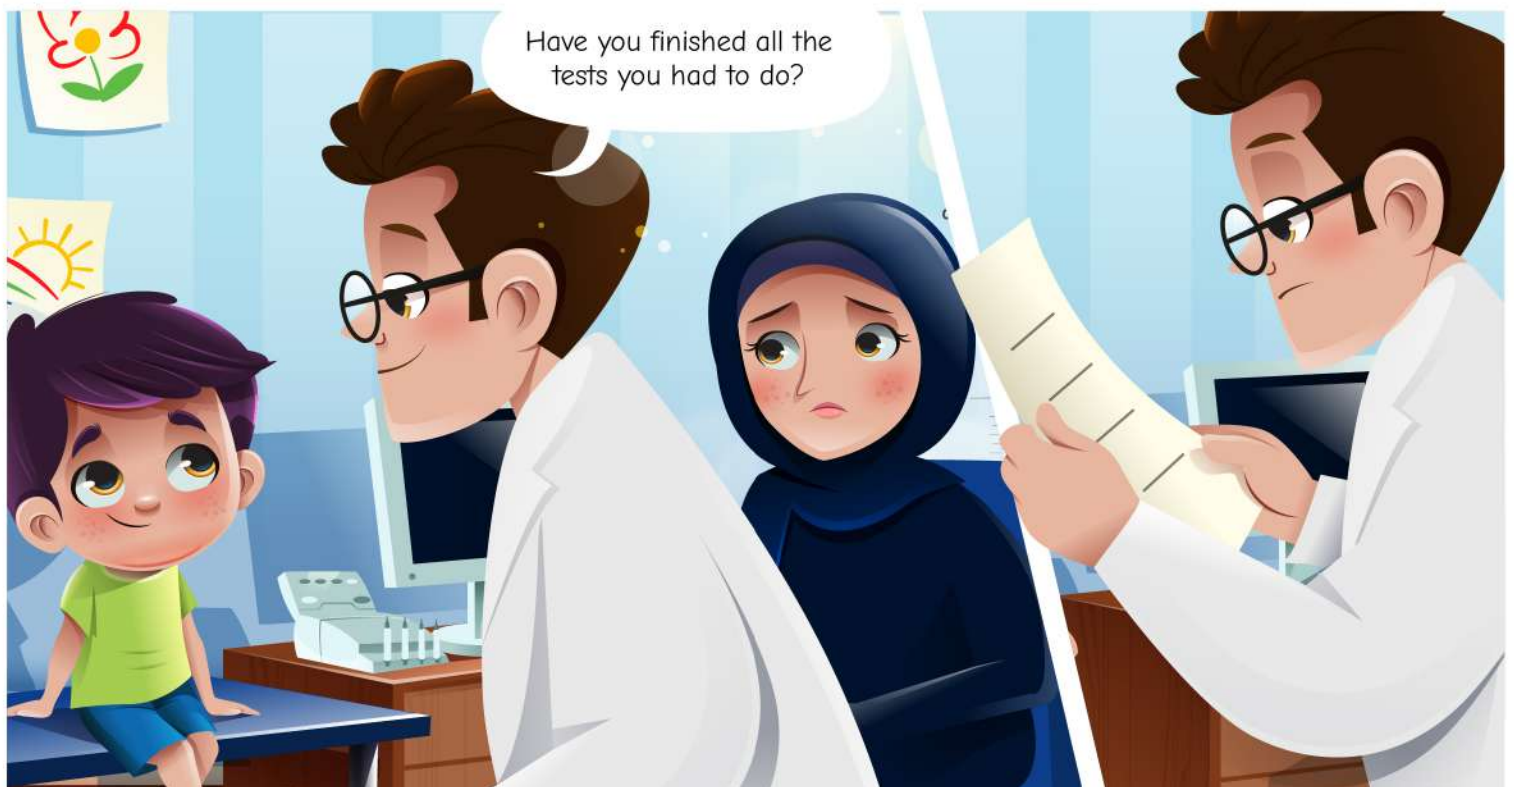

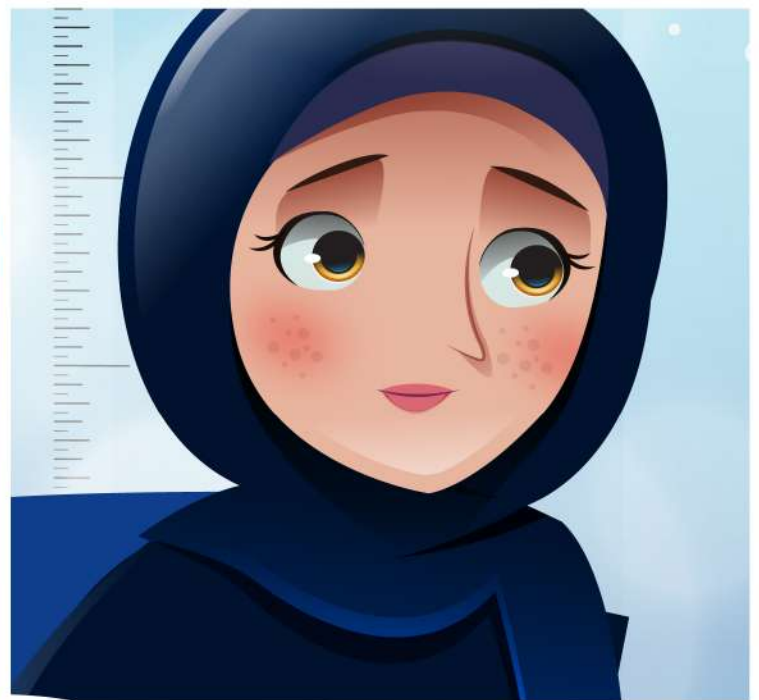

Well, but your friend mummy is here.

Okay, let's call your friend Amgad, to go with you to the doctor, and I can play with you instead. We'll see, then, who you'd prefer.

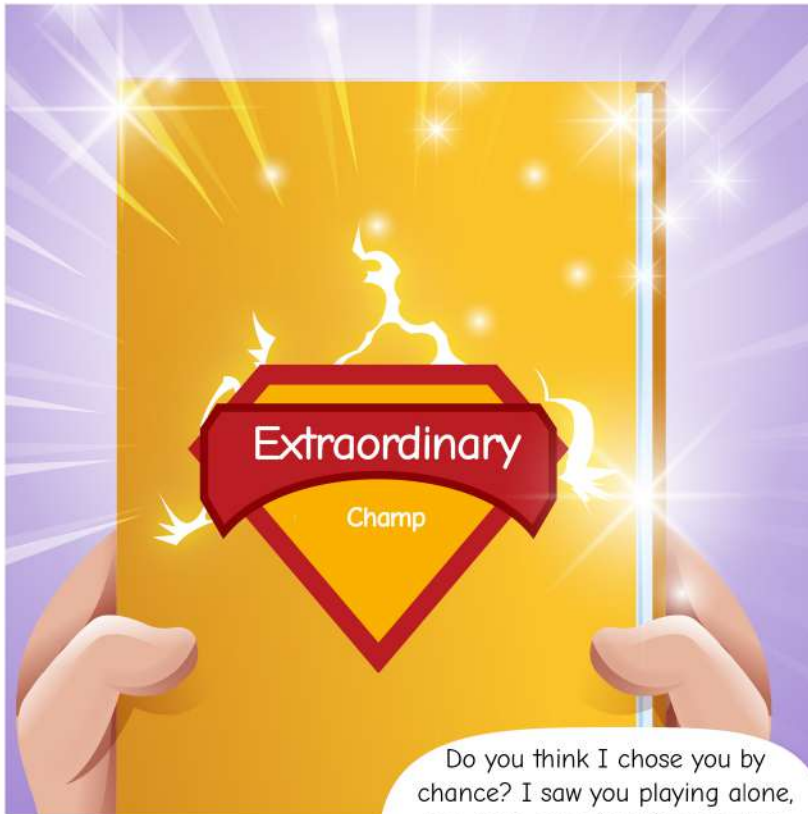

Don't worry, I will fix that mess.

Let me help you.

That's so kind of you!

Do you think I chose you by chance? I saw you playing alone, you were amazing. Do you want to just play alone all your life? Do you want the years to go by without using your talent?

Well, your small body might not be helping you right now, but you're still young and you'll grow up. All you have to do is, to give your talent the chance to shine. Don't stay by yourself when you can actually be a champion.

Your body might be little today, but when you take your medications and follow a healthy program, you'll grow. All you have to do is to give the real Zen a chance to shine and flourish.

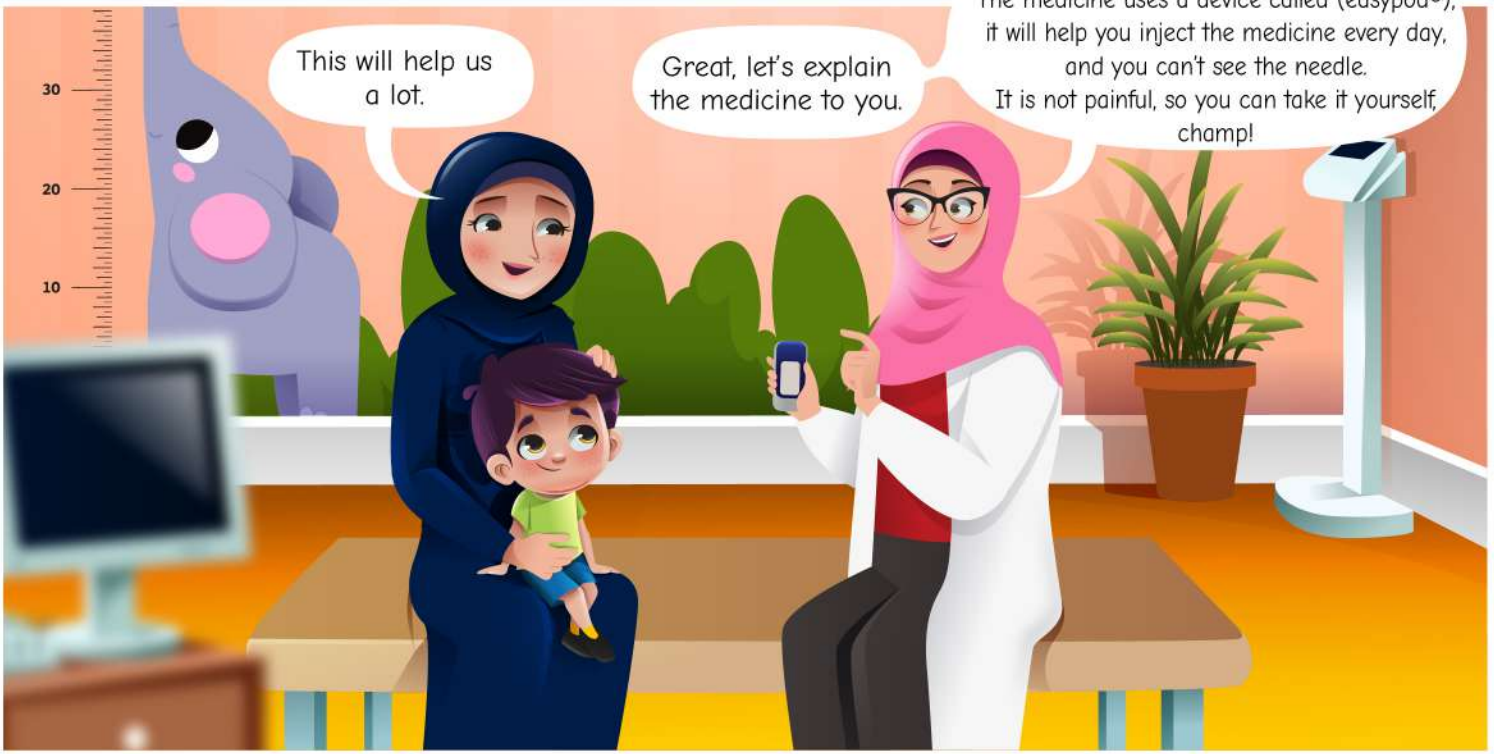

Don't stay by yourself when you can actually be a champion.

YES!

Awesome, Zen!

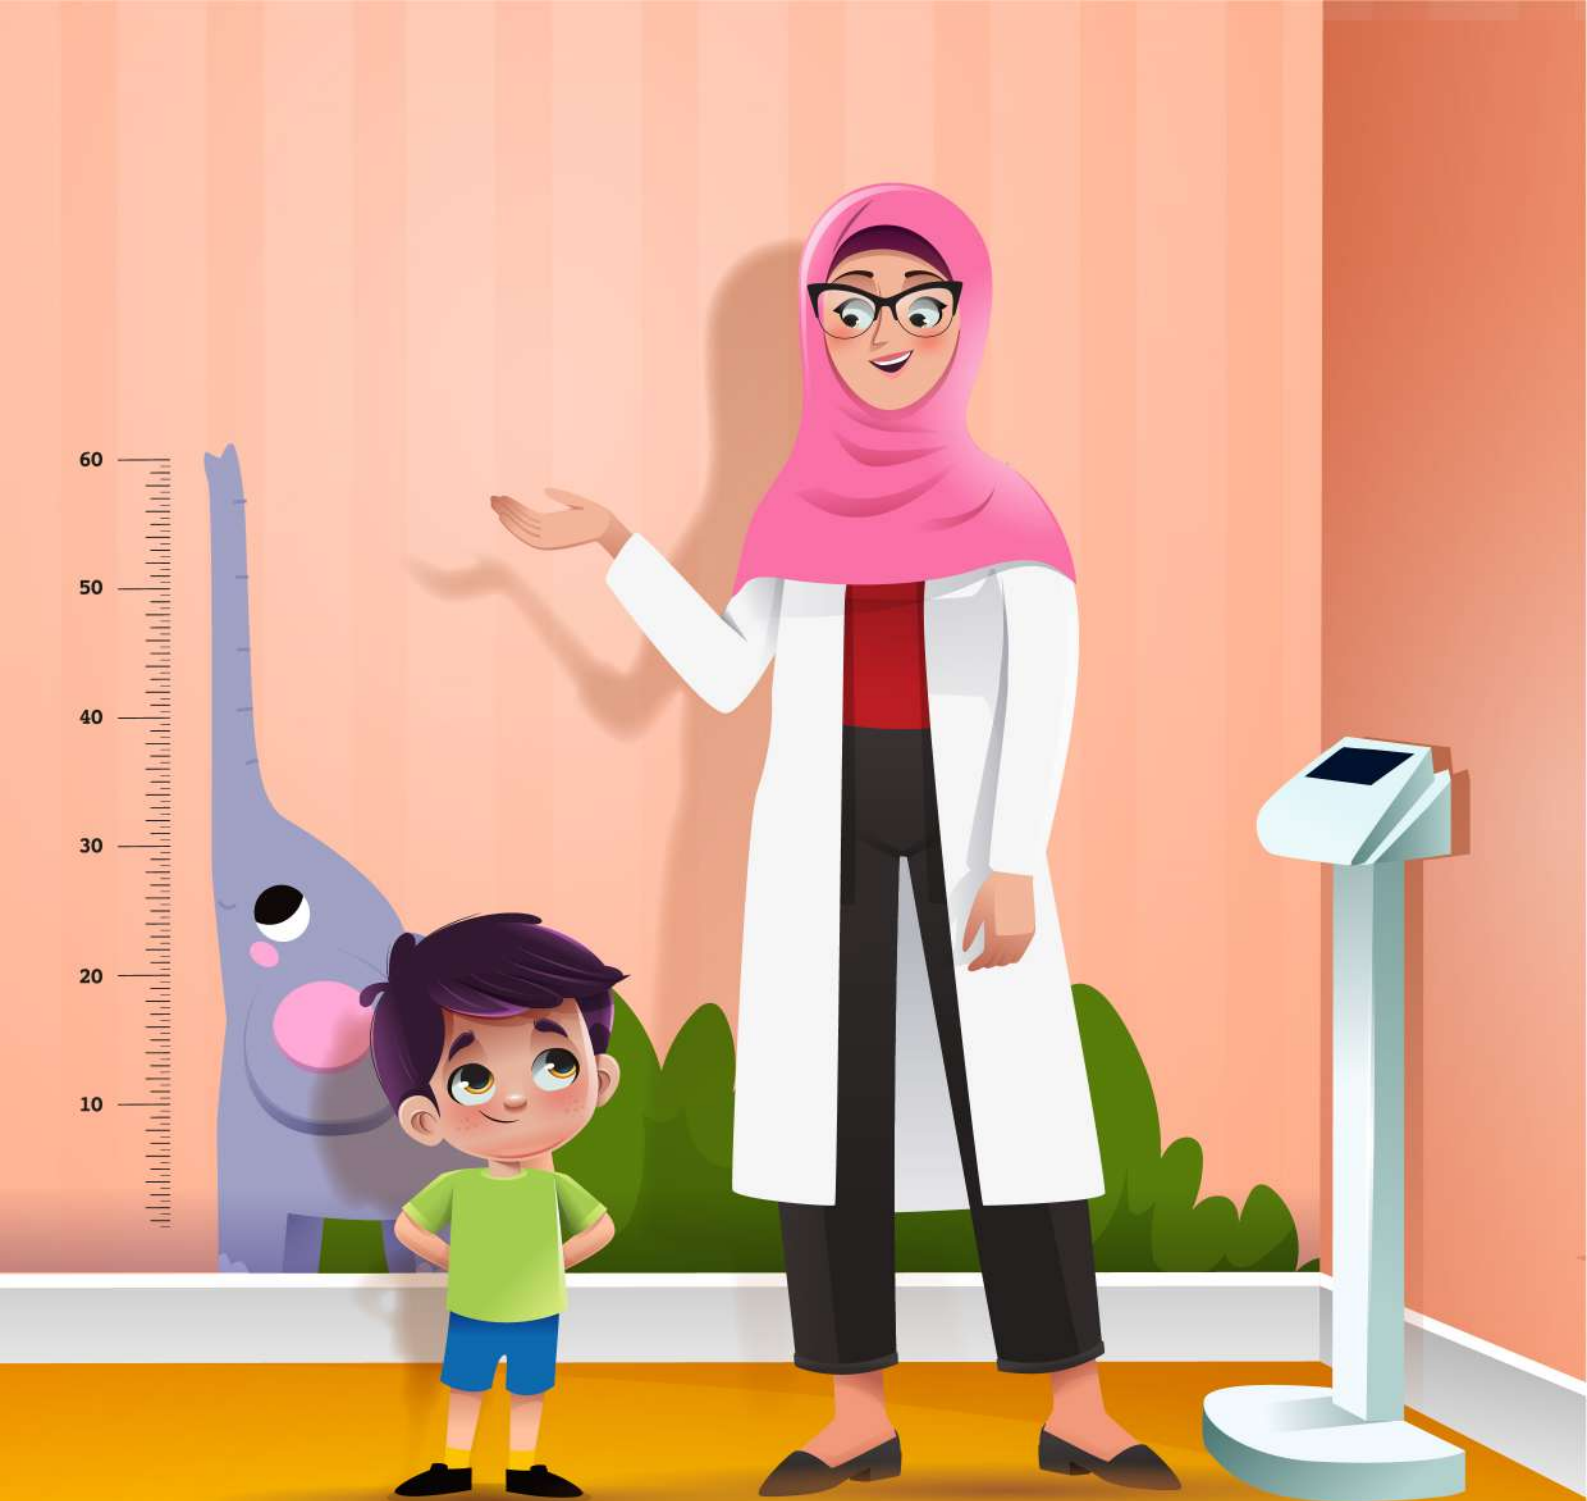

This will help us a lot.

Great, let's explain the medicine to you.

The medicine uses a device called (easypod®), it will help you inject the medicine every day, and you can't see the needle. It is not painful, so you can take it yourself, champ!

Only use this medicine if prescribed to you by a qualified physician and according to his/her specified doses, please read the insert leaflet and the device guide for use before usage.
